

## BECAUSE CHEQUES ARE BRANDING TOO

### security

- Permissions based on cheque amount
- Require eTokens for operation
- Data File Encryption
- Audit Trail

### convenience

- Print cheques within any module
- Automated or Manual Mode
- Facilitates Test Printing
- Cheque Grouping and Sorting
- Duplicate Cheque Detection
- TROY Printer Support

### cost-effective

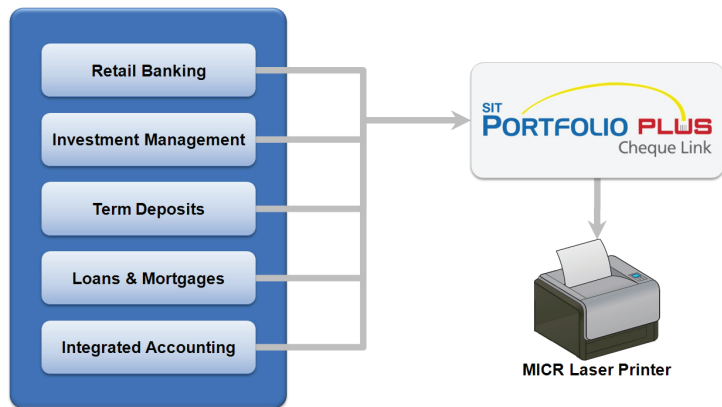

- Eliminates need for cheque stock

Cheque Link can be used to create cheques from within any core module of SIT's Portfolio Plus banking software, including Loans and Mortgages, Term Deposits, Investment Management, Retail Banking, and Integrated Accounting.

Cheque Link can produce cheques on demand or in bulk, depending on your needs.

Virtually any laser printer equipped with cheque paper and a MICR toner cartridge can be used with Cheque Link. Extra security features can also be enabled, as required.

Based on configurable threshold limits, you can apply encrypted signatures during automated printing or on demand using an eToken reader-less smart card during manual control printing.

## Key Features

**Easy to Use** | Software can be used in automated or manual mode.

**Security** | An eToken is required to grant access to the system and to release signatures for cheque printing.

**User Interface** | User interface is designed to appeal to Microsoft Office users.

**Audit Trail** | Cheque printing activity is recorded for reporting and system tracking purposes.

## Control and Audit

Audit controls are a critical feature of Cheque Link. As such, audit data is available for all manual or automated cheque requests. This audit data is made available using a standard cheque register report.

Automated mode allows for highly efficient processing of cheques where cheque-by-cheque control is not a factor.

Manual mode adds the following controls for the printing of cheques:

- Authorized personnel can adjust previous periods.
- Cheques can be previewed prior to printing.
- Signatures authorized for release prior to printing are triggered by pre-defined signing rules.
- Cheque copies can be printed on demand.
- Cheque register report can be previewed, printed, or exported detailing the status of each printed cheque.

## Printing Features and Benefits

**Paper Sizes** | Letter, Legal, and A4 supported.

**Continuation Page Printing** | Cheques can overflow to a continuation page that can be printed optionally on standard paper.

**Bank Account Definition** | Unlimited number of bank accounts supported.

**Cheque Copies** | Cheque copies can be printed to a non-MICR printer on standard paper, suppressing the signatures and MICR encoding for filing purposes.

**Troy® MICR Printer Support** | Utilize the security features of Troy printers, including the printer resident MICR font, jam recovery, and MICR cartridge detection features.

**Cheque Grouping and Sorting** | Cheques may be grouped and sorted during manual printing.

**Detection Features** | Previously printed cheques and cheques requiring manual signing are detected.

## Installation of Cheque Link

If you're planning to purchase Cheque Link, please contact Strategic Information Technology first. We'll be glad to help guide you in your acquisition of hardware for your network.
